

## FreeStyle Libre Flash glucose monitor and sensors effective April 1,2018

Plan Members and Dependents **who use insulin to manage their diabetes** are now eligible for coverage of an innovative glucose testing device that eliminates the need for routine finger pricks.

The FreeStyle Libre flash glucose monitoring system includes a reader and wearable sensors which are used to measure glucose levels and provide results on demand. The painless, one-second scan can even work through clothing.

Effective April 1, 2018, the FreeStyle Libre monitor and sensors will become eligible for Coverage.

**In order for plan members to be eligible for coverage, the member or dependent must use insulin to manage their blood sugar/glucose levels.**
